Subject Inspection of Clairton Works

I have been requested to do an inspection of Clairton Works by EPA HQ and now is as good a time as ever to do that with the temperatures on the low side but not real low (if you know what I mean). I have this scheduled for 10-27-09 to 10-30-09 and I have notified the Allegheny County Health Department on this. I will be with at least one other EPA employee for this effort. I hope to look at the batteries for topsides, doors, stacks (as many as we can get), look at some pushing and charging. I know that you have a rebuilding effort going on right now as to the desulf plant and you have agreements with ACHD on installling new batteries. We would like to discuss the status of everything with you on Tuesday prior to going into the facility for the emission inspection. I would like to look at your emission inventory for the most recent timeperiod that you have. If you have any issues or want to talk about anything prior to this inspection, send me an email or call me at 215-814-2161. Thanks.

bcc
